

Aurum Micro

We at Aztec Technologies, have introduced ready to use culture media for Microbiology under the brand name of **Aurum micro**. Aurum micro culture media are developed and produced under strict quality control which not only allows us to produce the products of the highest possible quality, but also to maintain consistent quality. Aurum micro culture media are available as 90mm and 55mm plates.

All raw materials and finished products are tested in-house in a well equipped Laboratory as per international standards under stringent supervision of highly qualified personnel. The manufacturing and packaging of all products is carried out under controlled environment to avoid cross contamination. Certificate of Analysis (CoA) is prepared as per ISO : 11133 standard.

The essential elements of Aztec quality management system include :

- Procurement of highest quality raw materials.
- Every batch testing according to a pre-defined protocol.
- Good manufacturing practices combined with in-process control.
- Comprehensive training for staff at all levels.
- Conformance to statutory Health, Safety and Environment requirements.
- No compromise for product quality.

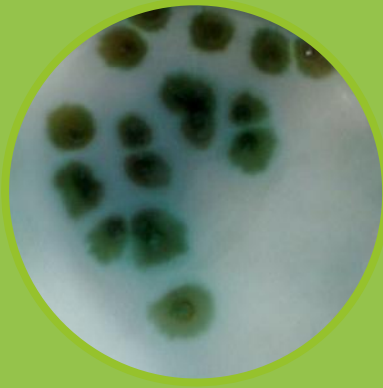

Aztec Quality Policy functions through all procedures described above which helps to maintain the company's high reputation for the performance of its products

At Aztec, we are continuously working to inject quality into all our services, from the development of a product designed to cover real customer requirements, to our after sales assistance.

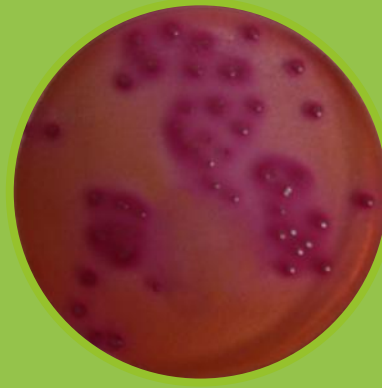

A state of the art facility, with an area of more than 700 sq. m. is being used for the manufacturing of Aurum micro culture media. The production facility has sufficient potential to fulfil the market demand.

The current product range of Aurum micro consists of products having applications in pharmaceutical testing, food and water testing, general microbiology, clinical pathology, etc.. This range also has products recommended by various guidelines like pharmacopoeias, ISO, etc..

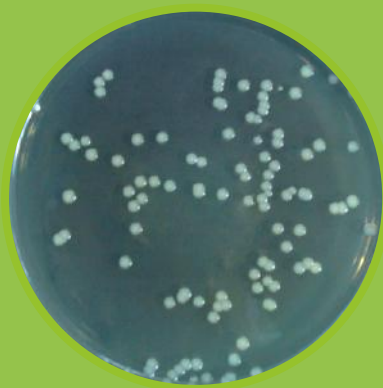

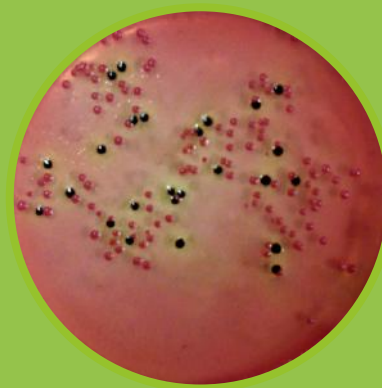

Blue-green colonies of *Pseudomonas aeruginosa* ATCC 27853 on **Cetrimide Agar.**

Escherichia coli ATCC 25922 with purple colour colonies on **Violet Red Bile Glucose Agar.**

Colourless colonies of *Escherichia coli* ATCC 25922 on **Soyabean Casein Digest Agar.**

Leifson's Deoxycholate Agar, Modified shows black colonies of *Salmonella typhimurium* ATCC 14028 and pink colour colonies of *Escherichia coli* ATCC 25922.

Aurum Micro culture media

- Products manufactured in modern, State of the Art facility.
- Products tested for performance as per ISO:11133 standard.
- Consistent lot-to-lot performance.
- Use of Ingredients from only Qualified Vendors.
- Extensive documentation to meet the most intensive regulatory requirements.
- Working in collaboration with our customers, Aztec is fully committed to maintaining the inventory necessary to fulfil our customer's needs.
- Stringent quality control measures, both on raw materials and finished products ensure consistent product performance.
- Products handled and manufactured by highly qualified, experienced and well trained staff without compromise on quality.
- Products fulfilling real customer requirements.
